

Heartland Health Equity Conference

October 19, 2017

Making Geography Irrelevant While Increasing Health Equity

Carla Deckert

KU Center for Telehealth and Telemedicine

Gwen Ratermann

Missouri Telehealth Network

Objectives

- Delivery of telehealth
- Delivery of tele-mentoring
- Gain insight to your suggestions, ideas, requests

Telehealth defined:

- The use of electronic information and telecommunications technology to support long-distance clinical health care, patient and professional health-related education, public health and health administration.

Tele-health provides access

to well trained health care providers
in multiple domains – for example:

- Medical
- Behavioral
- School-Based

Methods of delivery

- Telemedicine –

- The use of electronic communication and information technologies to provide or support clinical care at a distance. (clinics & schools)

- Remote Patient Monitoring

- Personal health and medical data collection from an individual in one location via electronic communication technologies, which is transmitted to a provider in a different location for use in care and related support.

- Mobile Health

- **Mobile Health (mHealth):** Health care and public health practice and education supported by mobile communication devices such as cell phones, tablet computers, and PDAs. Applications can range from targeted text messages that promote healthy behavior to wide-scale alerts about disease outbreaks, to name a few examples.

Telemedicine Room for Patient

Provider Types

- Physician
- Physician Assistant
- Nurse Practitioner
- Clinical Nurse Specialist
- Nurse Midwife
- Clinical Social Worker
- Clinical Psychologist
- Registered Dietitians or Other Nutrition Professionals

Tele-mentoring

- Extension for Community Healthcare Outcomes – through technology-enabled collaborative learning

Project ECHO's Mission

Expand the capacity to provide
best practice care

- for common and complex diseases
- in rural and underserved areas
- to monitor outcomes

Recognized a problem – developed a solution

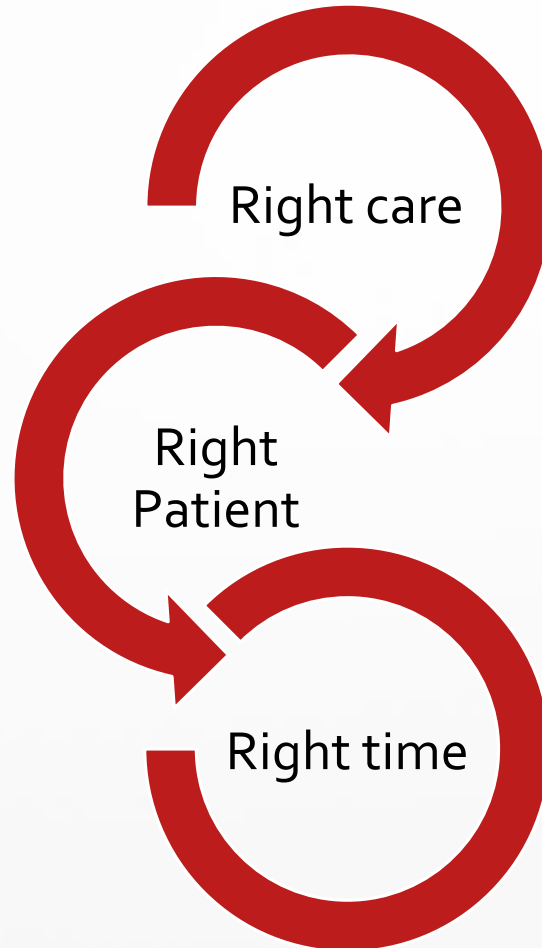

Sanjeev Arora, MD, MACP, FACP

Director of Project ECHO

Department of Internal Medicine,
UNM School of Medicine

Project ECHO can provide improved outcomes for patient's

How does ECHO accomplish this?

- Delivering right knowledge
- to the right clinician
- at the right time

Moving Knowledge
Not Patients

ECHO in an action verb

- Collaborative virtual learning
- Utilizing existing technology
- Combining case-based discussions
- Paired with didactics from experts
- Promotes evidenced-based best practices
- Proven method to enhance Workforce

Capacity

Specialty Team – offering Tele-Curbsiding

- Power of sharing
- Power of problem solving
- Power of enhanced medical care for patients

ECHO Participants

- Physicians
- Physician Assistants
- Advanced Practice Nurse Practitioners
- Nurses
- Medical Assistants
- Administrators
- Pharmacists
- Psychologists
- Social Workers
- Physician Therapists
- Occupational Therapists
- School Nurses

Diversity of organizations

- Federally Qualified Health Centers
- Rural Health Centers
- Hospitals
- Community health clinics
- Private clinics
- Schools
- Mental Health Centers
